💼 Portfolio

Education

- Thu Duc College of Technology
  Information Technology

  2020-2024

Skill

Backend :
- PHP, Laravel (Eloquent, Blade, Middleware, Authentication, Queue, API Development)
- NodeJS, Express
- WordPress Development

Frontend :
- Tailwind CSS, Bootstrap, Shadcn.
- React.js, Next.js, Zalo Mini App Development.

Database :
- MySQL, Firebase, MongoDB

Career goals

My goal is to become a professional PHP Laravel Developer with the ability to build optimized, secure, and scalable web systems. I am continuously improving my skills, focusing on Laravel, system performance optimization, and integrating DevOps for better deployment efficiency. I strive to contribute value to businesses by developing high-quality web solutions that effectively meet real-world needs.

Experience

Freelance Web Developer   *8/2024 - Now*
Key responsibilities:
- Designed and developed custom websites tailored to client needs using React.js, Next.js, WordPress, and PHP.
- Optimized website performance, improving loading speed, SEO, and user experience.
- Implemented new features to enhance functionality and scalability.
- Utilized modern technologies such as Docker, Tailwind CSS, and Bootstrap to streamline development and improve UI/UX.
